[Chronostratigraphy](#)

**Authors:** Maillieux, 1939; Martin, 1969a; Servais & Maletz, 1992.

**Description:** Micaceous and sandy shale (Michot, 1957).

**Stratotype:** In the railway section north-west of the village Sart-Bernard, between km 73.1 and 73.3 (Martin, 1969; Servais & Maletz, 1992).

**Area:** Condroz inlier.

**Thickness:** not estimated yet.

**Age:** The restudied graptolite assemblage points to a *Didymograptus bifidus* biozone, Llanvirn (Bulman, 1950); this is not accepted by Servais and Maletz (1992) who follow the definition of Maillieux (1939) and include in the unit strata containing a macrofauna of several fossil groups of an ex-Llandeilo age.

**Remarks:** Synonym: Schistes de Sart-Bernard; Assise de Sart-Bernard.

(J. VERNIERS)
